

Biowash Ball

*your intelligent alternative and choice
to detergent free laundry*

The **BIOWASHBALL®** is composed uniquely of natural ceramics contained in a plastic non-toxic sphere with only natural pigment, which makes the **BIOWASHBALL®** 100% recyclable after the three year period.

How the BIOWASHBALL® works:

- BIOWASHBALL® consists of 8 different ceramics which works synergistically. It is the powerful remote infrared rays emitted by the BIOWASHBALL® which break the hydrogen molecules of water to increase molecular movement. This gives water a high penetration capacity and improves its washing properties.
- The BIOWASHBALL® emits negative ions which is beneficial to all living beings. Negative ions works against anti-ageing and oxidation.
- With the BIOWASHBALL® it weakens the adherence of dirt on fabric so that it is easily removed without the use of detergents.
- The BIOWASHBALL® has an alkaline pH of about 8 to 10 which is equivalent to that of an ordinary chemical detergent.
- The BIOWASHBALL® eliminates chlorine compounds in water and decreases its superficial pressure, increasing therefore its washing power.
- Using BIOWASHBALL® can eliminate the use of detergents. It safeguards your linen from bleaching, oxidation, caused by chlorine diluted in water. Fabrics remain elastic.
- The BIOWASHBALL® eliminates pathogen germs in the water of your washing machine, giving clean and healthy linen.

*Placing a
BIOWASHBALL
in your refrigerator will
keep your vegetables,
fruit, meat and fish
fresher for longer and
removes bad odours*

Compared to a normal washing process, BIOWASHBALL® is:

- | | |
|----------------------------------|--|
| Hypo-Allergenic: | By eliminating detergents no side effects dues to detergent residue on clothing and linen |
| Antibacterial: | Eliminates pathogen germs |
| Economical: | Eliminates detergents and softeners. Save electricity & water as a rinsing cycle is no longer required allowing you to reduce your washing program |
| Environmentally Friendly: | No phosphates, protects ground water system, rivers & sea from chemical pollution |
| Travel Companion: | Easy to travel with and use where ever you go even for hand washing |
