

# Wireless Electricity Monitor

*The elite wireless electricity monitor allows you to instantly understand your energy usage, giving you the power to reduce it.*

- The elite gives you instant feedback about how much electricity you are using, every six seconds.
- You can see the impact of turning equipment and lights on or off and start saving straight away.
- The elite has an innovative memory function that tracks your electricity usage – daily, weekly or monthly.
- You can see how your energy consumption changes over time as you make changes to your behaviour.
- All Efergy electricity monitors are simple to install and easy to use.

## PRODUCT FEATURES:

■ Daily, weekly and monthly memory

### Memory Function

The key feature of the elite electricity monitor is the memory function. This allows you to track your electricity by day, week and month.

You can track the reduction in your energy costs as you change your electricity usage

### The Electricity Monitor comprises of 3 components:

1. A battery powered wireless display unit
2. A battery powered wireless transmitter
3. A current transformer clip (sensor)
