

Wireless Electricity Monitor

with logging and software

The original Eergy wireless monitor has just got better

The e2 wireless electricity display device is a wireless energy monitor that can tell you at a glance how much electricity your home is using from moment-to-moment and in total (day, week, month and average consumption patterns)

NOW you can also upload the data to your PC. The new look display, Energy saving toolkit and eLINK energy monitoring SOFTWARE is all included. Contents: Meter, transmitter and 1 sensor (for single phase installations)

**For 3 phase installation you will need to purchase 2 extra sensors.*

be energy efficient through technology

discover:

- How much electricity is being used at any given moment
- The total amount of money being spent on electricity
- The difference in electricity consumption by turning on and off various appliances
- How much money can be saved by reducing usage

understand:

- Daily average consumption
- Savings of 5% - 20% off typical energy consumption
- Consumption history
- Carbon footprint

Wireless electricity monitor displaying instant power, costs and estimated CO2 emissions. It can also show historical and average data.

- Take control of your energy usage
- Monitor the cost of using your home appliances and lights
- Discover and reduce the size of your carbon footprint
- Fun and educational for the whole family

save up to 20%

off your electricity bill, through greater awareness
